“The publication edited by Andrej Božič on *Thinking Togetherness. Phenomenology and Sociality* presents a novel and up-to-date account of phenomenology, which comprehends this philosophy as an essentially intersubjective or a communal enterprise; in the volume, phenomenology exceeds narrow limits of subjective life of consciousness, and focuses on various phenomena connected to the public, communal, and political spheres. [...] The book can serve both as a textbook in the heritage of the phenomenological movement and as a collection of original studies.”

Assoc. Prof. Dr. **Witold Płotka**

Institute of Philosophy, Cardinal Stefan Wyszyński University in Warsaw

“The comprehensive collection of contributions entitled *Thinking Togetherness. Phenomenology and Sociality* represents an important scientific achievement within the field of phenomenological philosophy. The monograph, the central topic of which is the elucidation of some of the essential dimensions of the social, was prepared, as already a simple glimpse over the table of contents reveals, in cooperation with an assemblage of authors from across the world. Such an international configuration of the whole composed of 32 chapters, meaningfully arranged into seven thematic sections, imparts upon the volume the character of an extensive and exhaustive, panoramic scrutiny of the phenomenological manner of confronting the question what constitutes the fundamental traits of interpersonal co-habitation with others. [...] *Thinking Togetherness. Phenomenology and Sociality*, therefore, not only offers a historical account with regard to the development of phenomenology, but also quite straightforwardly concerns its relevance within the philosophical research that deals with the contemporary problems of society.”
